

THE BEST SMALL FLUID SECTION IN THE INDUSTRY

FIELD SERVICEABLE

Whether you are replacing your entire fluid section or the packings only, Titan makes it fast and easy with the T-slot piston and its one-piece, modular design.

SELF-ADJUSTING / COMPENSATING PACKINGS

Our precision-machined Quad+™ packings last up to 50% longer than the competition and give you the best performance every time you spray. They are self-adjusting so you never have to worry about over tightening, which leads to premature wearing.

NO WEARABLE PUMP CYLINDER

Save on long-term repair costs. Titan's Impact™ series is designed without a wearable cylinder. It never wears and never needs replacing.

LONGER LIFE

The materials make the difference. Titan's durable, stainless steel ball valves and reversible tungsten carbide seats last twice as long as standard seats – and at half the cost! And our stainless steel piston rods are extremely resistant to abrasion and corrosion, extending the life of your sprayer.

PERMALIFE™ CYLINDER

Never wears, never needs replacing.

EXCLUSIVE

QUAD+™ UHMWPE PACKINGS

First lip wipes abrasive paints clean to prevent damage to piston and main sealing lips.

A DOUBLE O-RING

Ensures 100% static seal to cylinder.

B LUBRICATING GREASE

Each pocket filled to keep packing lubricated.

WHAT IS UHMWPE?

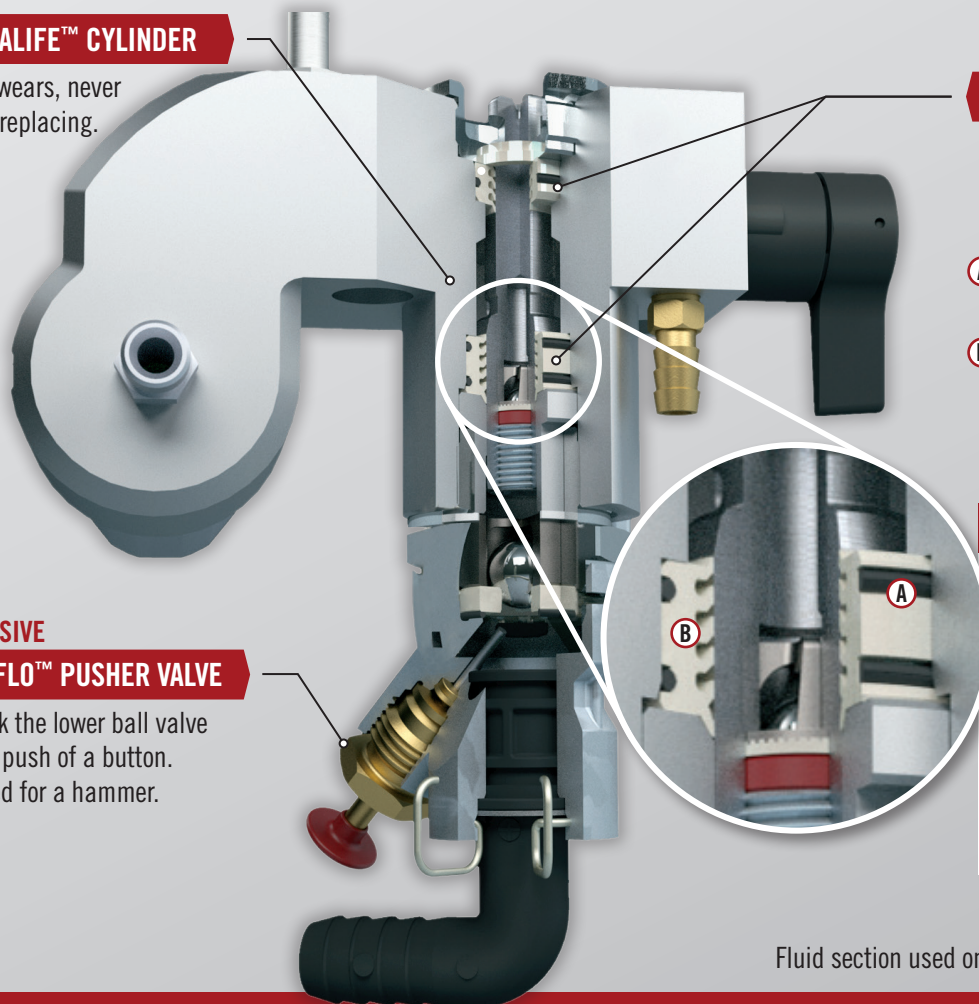

Ultra High Molecular Weight Polyethylene is the industry's most durable packing material. It is used on all Titan Impact sprayers.

This material is self-lubricating and will not dry out like competitor's leather packings. It delivers the best resistance to wear and abrasion.

EXCLUSIVE

SUREFLO™ PUSHER VALVE

Unstick the lower ball valve with a push of a button. No need for a hammer.

GRACO® PROCONNECT

FLUID SECTION

FLUID SECTION

WEIGHT: 6.50 lbs.

INCLUDES:

- A** Pressure Transducer
- B** Manifold Filter Housing
- C** Pusher Valve™
- D** Prime Spray Valve

ADDED VALUE: \$375

WEIGHT: 3.15 lbs.

DOES NOT INCLUDE:

- Pressure Transducer
- Manifold Filter Housing
- Pusher Valve™
- Prime Spray Valve

ADDED VALUE: \$0

CHANGE TIME

QUICK-CHANGE

In minutes.

1-PIECE DESIGN

Fluid section includes prime spray valve, pressure transducer, manifold filter/filter housing and pusher valve. Easy to replace.

DESIGN

4 SEPARATE PIECES

Fluid section, prime spray valve, pressure transducer and manifold filter/filter housing. Significantly increases costs to maintain all extra parts.

ALL WETTED PARTS

Includes: piston, packings, valves, filter housing, filter, prime spray valve, Sureflo™ pusher valve and electronic pressure transducer.

WHAT'S INCLUDED

NOT ALL PARTS

Only piston, packings, cylinder and ball valves are replaced. Prime spray valve is a costly service center rework.

ALL IMPACT SYSTEMS

Retrofittable to all Impact™ 440, 540 and 640 sprayers.

COMPATIBILITY

ONLY NEW 2015 PC MODEL

Graco 390, 395, 490, 495 and 595.
